## Extending Aegir

<b>Contrib modules</b>	<a href="http://community.aegirproject.org/contrib-modules">http://community.aegirproject.org/contrib-modules</a>
<b>Aegir API</b>	<a href="http://api.aegirproject.org">http://api.aegirproject.org</a>
<b>Hooking into Aegir / injecting into vhosts/settings.php</b>	<a href="http://community.aegirproject.org/node/39">http://community.aegirproject.org/node/39</a>
<b>Communicating with install profiles from the New Site form</b>	<a href="http://mig5.net/content/developing-aegir-extending-aegir-and-communicating-install-profiles">http://mig5.net/content/developing-aegir-extending-aegir-and-communicating-install-profiles</a>
<b>Storing data in Aegir</b>	<a href="http://www.computerminds.co.uk/articles/storing-data-aegir">http://www.computerminds.co.uk/articles/storing-data-aegir</a>

## Integrating Aegir into other systems

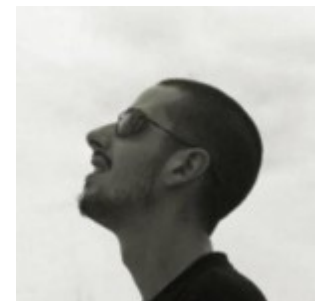

<b>Integrating Aegir with FTP</b>	<a href="http://cafuego.net/2011/11/08/integrating-aegir-linux-and-ftp">http://cafuego.net/2011/11/08/integrating-aegir-linux-and-ftp</a>
<b>Ubercart integration</b>	<a href="http://community.aegirproject.org/node/516">http://community.aegirproject.org/node/516</a>

## About mig5

mig5 is Miguel Jacq, a French-Australian Linux sysadmin and core Aegir developer based in Melbourne, Australia.

With over 8 years experience in Linux and 6 years in Drupal, mig5 provides sysadmin support services to small to medium-sized Drupal agencies around the world that can't afford full-time sysadmins.

His primary skills are automating with Puppet, Jenkins, Fabric, high availability systems & performance, developing Drupal-centric deployment methodologies, change management, monitoring, security and disaster recovery.

Do you need someone to manage or tune your Linux servers? Need Aegir help? Come say hi!
